

## PARTNERSHIP SUCCESSES

---

*Heatcraft retrofitted 216 coils in the **Sears Tower, Chicago** (one of the largest commercial office buildings in the world) one year earlier than originally scheduled - under budget and without any tenant shutdown.*

---

Technicians lower one of 16 made-to-fit replacement coils constructed by Heatcraft for **Boston's World Trade Center**. Since the center's main hall is booked all-year round for conventions, trade shows and special events, the coils had to be scheduled for delivery on Friday so that installation could be done when the convention center was empty.

---

---

**The Mississippi Baptist Medical Center** - a 650-bed facility in Jackson - relied on Heatcraft replacement coils to help supply air at a constant 55°F to a total of 720,000 square feet. Since the replacement, patient complaints have dropped "off the charts".

---

---

The environmental testing chamber at **McKinley Climatic Laboratory at Eglin Air Force Base** depends on custom installed Heatcraft coils to test the durability and performance of aircraft and weapon systems at temperatures as low as -65°F.
